

# Patient Billing & Charges

## Outpatient Department of Fauquier Hospital

The Fauquier Health Wound Healing Center is an outpatient department of the Fauquier Hospital. Therefore, any wound healing center charges for services are considered as hospital charges.

The wound healing center is not located on hospital campus, but we do adhere to all hospital policies and procedures. We also employ nursing teams as if we were inside the hospital facility.

## Understanding Your Benefits.

It is important to understand hospital benefits through your insurance plan. The debridement you may receive during your appointment is considered as a surgical procedure and is submitted as a surgical CPT code to your insurance company.

## Multi-specialty Team of Independent Physicians.

Our multi-specialty panel of physicians are not employed by the Wound Center. They are independent physicians who provide services through our hospital's wound healing department. In most cases, services provided will result in a separate bill from the independent physician and/or their practice. These physician fees are in addition to your hospital bill.

The Fauquier Health Wound Healing Center is proud to offer advanced wound healing therapies to our community. Thank you for choosing us to participate in your care.

For information on our billing process, please visit our website at [FauquierHealth.org/pay-my-bill](https://FauquierHealth.org/pay-my-bill) where you'll find information about billing and charges, FAQ's, our Financial Assistance Program, and more.
